Subject: RE: [Nonresponsive based on revised scope] Bid Response for Pile #1 BEFORE DISCOVERY OF UHC'S

Hello [Nonresponsive based on revised scope] / Christine

If Environmental Restorations treat's the metals (lead) < LDR's, the result would be a TSCA only regulated waste (PCB's > 50 ppm) [Nonresponsive based on revised scope] has a TSCA Permit, therefore that would be acceptable for disposal. If that TSCA waste also contained dioxin's, that are not "listed" RCRA waste, it would still be acceptable, again as long as the material did not have a RCRA waste code. UHC's are only regulated, if associated with a RCRA waste, they don't apply for a TSCA waste.

Because the specific source of this contamination can't be documented, listed waste codes would not be correct. However because of this please run a Full TCLP for disposal analysis, to rule out the RCRA concerns. **Ex. 4 CBI**

Ex. 4 CBI

Please let me know if you have any questions.

Regards
